CITY BUS PLASTIC *seats*

The largest autoparts manufacturing group in Malaysia

Moulded Side Grip

Clear Plastic Advertising Space

APM's city bus plastics seats are the answer to an urban transit seating for public transport solution. Its ergonomically moulded profile provides the best in passenger comfort with heavy duty usage in mind. The seat design integrates a handle grip at the top for passenger's safety and convenience while getting on and off the bus.

With the utilisation of modern and high technology computerised programme and hardware, APM is able to design and test every model of its automotive seats. Together with the aid of the most stringent in-house testing facilities, APM ensures its automotive seats meet the requirements of various International Certification Bodies such as E-Mark (Europe) and ADR (Australia).

It is APM's commitment to its customers to produce automotive seats of the highest in Safety, Quality and Reliability.
